

Healthcare Claims Performance Dashboard

Portfolio Project | Power BI | Healthcare Analytics

An analytical dashboard showcasing claims performance, cost drivers, and operational insights to support data-driven healthcare insurance decisions.

■ Portfolio Summary

This dashboard analyzes healthcare claims data to uncover cost drivers, approval efficiency, utilization trends, and patient demographics, demonstrating strong data storytelling and business-focused analytics.

■ Key Insights

- 85% approval rate indicates efficient claims processing.
- Neurology and Cardiology are the primary cost-driving departments.
- Balanced mix between Government and Private insurance claims.
- Al Salam Hospital shows the highest utilization.
- Claims peak between March and May, indicating seasonal trends.
- Stroke, Seizures, and Imaging procedures drive the highest costs.
- Highest utilization among patients aged 30–60 with balanced gender distribution.

■ Skills Demonstrated

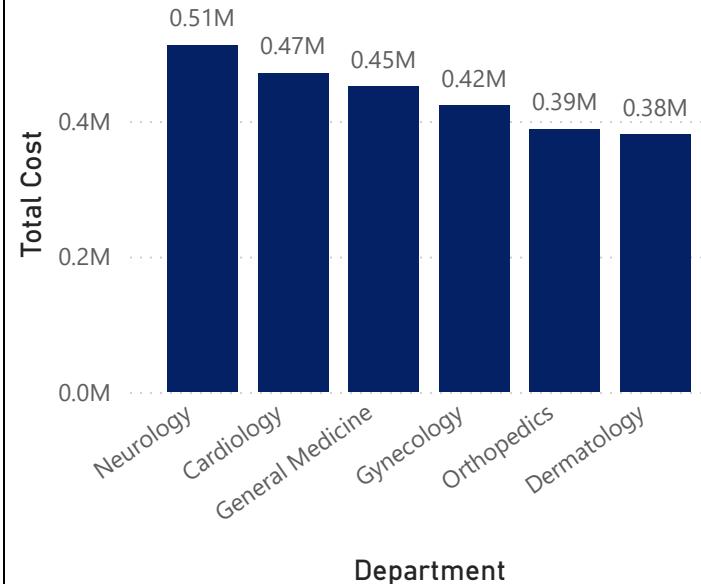

Power BI • DAX • KPI Design • Healthcare Analytics • Data Visualization • Business Insight Generation
